

# DoseTech DMS Detergent Spray System

- Fast and Efficient Spray
- Enhanced Detergent Coverage Prior to Manual Cleaning
- Spread Detergent Quickly and Evenly Across Instrument Tray
- Easy, One-Push Operation
- Eliminates Manual Trigger Spray Pumping
- Adjustable Spray Nozzle

The DoseTech Detergent Spray System is a dispensing system used to apply precise amounts of pre-soak detergents. This chemical dosing system uses an electronically controlled peristaltic pump to dispense detergent onto surgical instruments prior to manual cleaning. The detergent spray system is designed to replace manual trigger sprayer application. An easy to use spray applicator provides fast and efficient coverage of instruments in a tub or tray. The system is comprised

of a main control/pump unit, peristaltic pump, spray wand applicator, detergent supply line with weight and filter, detergent discharge line, and mounting hardware.
